# Marble Tablets in Main Hall of Hospital

## THE CHARITY HOSPITAL

OF LOUISIANA

WAS FOUNDED IN THE YEAR 1786

BY

DON ANDRES ALMONASTER Y ROJAS,

To whose generous endowment, the munificence of the

LEGISLATURE OF THIS STATE,

and the liberality of the State of Pennsylvania, the community is indebted  
for the means of erecting this edifice, built in the year

1832.

His Excellency A. B. Roman, being Governor and Ex-Officio  
President of the Institution.

To record which and inscribe hereon the names and contributions of its distinguished  
benefactors

### THIS TABLET HAS BEEN ERECTED.

Etienne Bore	\$ 1,000.00	A. C. Hutchinson	50,000.00

# Annual Report of the Vice-President

## J. P. HENICAN

New Orleans, February 21st, 1921.

His Excellency, John M. Parker, Governor of the State of Louisiana, Ex-Officio President of the Board of Administrators of Charity Hospital of Louisiana, Baton Rouge, La.

Your Excellency:—I have the honor to report upon the past year as one of relief from many of the vexatious problems confronting us during the abnormal period of inflation which apparently culminated last spring.

Financially, it has been possible to meet all the demands of a further advance in the wage scale, and to care for the rising cost of many of our very necessary supplies such as coal, alcohol, gauze, bandage cloth, etc., without encroaching upon the Special Fund, thus permitting the employment of the latter in the completion of the lighting system and the installation of a thoroughly modern morgue, which were among our most pressing needs, but our accomplishments were necessarily limited by the inability of the State to fully meet our budget which contemplated improvements in equipment and additions now so conspicuously lacking for the welfare of our employees, and more particularly the safety of our patients. These involve larger quarters for the internes, and for the female help, and a modern sprinkler system which latter will materially lighten the burden entailed through the heavy increase of insurance demanded by a recent appraisalment of our property interests.

We have stressed the importance of Fire Prevention in previous reports and a thorough realization on our part of the conditions existing is best evidenced in our efforts to secure the funds required through private solicitation which met with many generous responses but failed to provide more than a small proportion of the contemplated expenditure owing to the high cost of materials and labor.

In fact, when it is realized that there is available to us in monthly installments only \$1,666.66, it can readily be seen how wholly dependent we are upon the generosity of our State if our present ambitions to modernize and standardize our institution are to be realized. Standardization implies primarily the conscientious care of the patient in all details, and commendable efforts have been launched by our Medical Committee with a view to reorganizing the various surgical and medical departments, as well as the systematizing of case and history records, to conform to the accepted requirements.

The continued shortage of nurses is causing much concern, and it is felt that steps must soon be taken to attract candidates to the training school.

To meet these conditions it is obvious that a larger appropriation is imperative, as our present funds will not permit of any material increase in our staff of employees such as will be necessary if the views as to standardization and the needs of the nurses training school are to be effectively met, as despite the fact that our cost per patient per day has remained at the incredibly low figure of \$1.53, our appropriation fell short of expenditures approximately \$50,000.00, which was cared for by our revenues from other sources.

In this connection, I would call attention to the specific bequest for improvement of the Miles Amphitheatre. While the amount in itself is comfortable, it is inadequate to cover the alteration and enlargements necessary to bring the facilities up to the standard of other institutions, and it is considered injudicious to attempt to make use of the money in hand in partial reconstruction, which would be of no material advantage. Nor have we abandoned hope of the erection of our own power plant for generating electricity,

whereby a substantial saving in overhead expense would be effected, and render us independent of the public service, at present taxed to its fullest capacity.

It is patent, therefore, that our financial needs are numerous and urgent, and we recommend them to your favorable consideration so that the outstanding deficiencies in our physical property may be corrected, and the projected policies to govern our professional work may not be interrupted.

The important contribution of our State to the activities of the Nation at a most critical period of its history brought from our National Government recognition of the value and usefulness of our institution as one of its resources in the program of national defense by the selection of the Charity Hospital as the headquarters of the Military School established by order of the Surgeon General of the Army under direction of Major Rudolph Matas during the years 1917 and 1918. As a result of the opportunities for clinical study and practice owing to the large mass of material available in our institution, our City was designated as the Southern center of the educational units where medical officers obtained thorough instruction in all collateral knowledge connected with war fractures and war wounds, as well as the latest advances in surgical technic. Our broad field for scientific research work was also utilized to investigate certain important remedies, especially Dichloramin T, as an antiseptic for wounds. Few of our citizens are aware of the signal honor conferred upon the Charity Hospital and its corps of surgeons, and I am bringing the fact to your attention, even at this late date, to emphasize if possible the value of our institution to the State and to the Nation.

We are deeply pained to report the death of our esteemed co-worker, Mr. Albert J. Laplace, whose passing deprived our institution of one of its staunchest friends, ever ready to render a service in the relief of suffering humanity.

We have been the recipients of many substantial donations from sympathetic citizens which have greatly contributed to the comfort and care of our inmates, and are deeply grateful for the splendid assistance rendered by the Needlework Guild of the Ladies Auxilliary in providing many necessary articles in our household supply.

We are again indebted to Sister Stanislaus for the embellishment of our admitting room, and for the conscientious support of our Superintendent, Dr. S. W. Stafford, ably assisted by House Surgeons, Doctors Gelpi and Landry.

Our worthy Secretary-Treasurer, Mr. Fred. W. Matthews, has merited our continued approbation through his diligent and painstaking efforts at all times.

Personally, I am under renewed obligations to every member of our Board for their uniformly courteous consideration and active support.

Yours respectfully,

JOSEPH P. HENICAN,

Vice-President.

## Report of the Medical Committee

New Orleans, February 21, 1921.

To the Vice-President and Board of Administrators of the Charity Hospital,  
New Orleans, La.

Gentlemen:—During the latter part of 1919, the Visiting Staff organized as "The Society of the Medical and Surgical Staffs of the Charity Hospital." About the same time, the Advisory Medical Committee, being heartily in favor of such an organization, tendered their resignations. As these matters were not acted upon until the December, 1919 meeting of the Board, complete organization did not become effective until the following year.

The Advisory Medical Committee, composed of Drs. J. A. Danna, C. Jeff Miller, Chas. A. Borey, P. Michinard, Felix A. Larue, J. T. Halsey and J. M. Batchelor, had rendered valuable service to the Board and we extend to them our sincere thanks and appreciation and commend their attitude toward the new organization.

The Staff organization stands for the maintenance of efficiency in the clinical and bedside service of the divisions of the Hospital to which the members are attached, or assigned, including co-operation with the Board of Administrators, the official, domestic and clerical forces, and to develop the material at the hospital through the frequent discussion of cases, methods of record and report, and particularly in a co-ordination of effort for a better service to the sick.

The organization of the Staff includes the Executive Body, composed of the Chiefs of Service and Consultants. This Body can be of service to the Board of Administrators in the same capacity as the Advisory Medical Committee, and we heartily recommend such action. Furthermore, we recommend full co-operation with the Staff through its executive body, as an integral and important factor in sharing some of the perplexing matters and solving many questions in which they are concerned, for the development and improvement in the treatment of the sick and injured.

The Pathological Department has been enabled to fully equip their laboratory, as the amount requested in their budget was approved. The X-ray Department is badly in need of new equipment and the Roentgenologist has prepared a full report which will be presented in due time.

We earnestly recommend prompt attention to our Record system, particularly in the clinics.

During the year, we had the misfortune of losing our Chairman, Mr. Albert J. Laplace, who died October 29th, 1920 after having been confined to his home for several months. He was earnest in his endeavors and gave much of his time to the hospital and committee work, all of which we, as his associates, deeply appreciated.

Yours respectfully,

M. J. HARTSON, Acting Chairman,  
WILLIAM PFAFF,  
J. P. HENICAN.

## Report of the House Committee

New Orleans, February 21, 1921.

To the Vice-President and Board of Administrators of the Charity Hospital, New Orleans, La.

Gentlemen:—The electric wiring installation, begun in December, 1919, was completed in July, 1920 and embraced all buildings with the exception of the Laundry, Bakery and Ice House. The total cost amounted to \$61,580.50.

It is well to consider the manifold advantages and the inestimable value this work means to the hospital. Prior to the installation, many wards were dependent upon one gas jet, which was not sufficient light to enable the doctors and attendants to do emergency dressings, thus necessitating removal of patients from their beds by roller to a dressing or operating room, to permit of some slight attention which under present circumstances can be readily done right in the ward. Furthermore, the indirect light fixtures diffuse a soft light, at the same time evenly distribute it throughout the ward.

By comparing the cost of service from the N. O. Railway & Light Co. for six months prior to this installation with six months after, we find the increase to be approximately \$190.00 per month. The actual cost now averages \$918.00 per month (based upon six months July 1st to Dec. 31st, 1920) and may justify the erection of our own plant to generate current; however, this does not alone govern the question of probable dollars and cents to be saved, since several other considerations enter as a factor to be carefully reviewed. By centralizing the source of electrical energy in the Power House and distributing the wires underground, the present condition of scattered services with its attendant fire hazard, would be obviated, and by eliminating the mixed current (direct and alternating) now furnished by the N. O. Rys. & Light Co., the maintenance of the installation would be more efficient since the necessity of carrying a multiplicity of parts, some for the alternating current motors and some for the direct current motors, would be obviated, thus few repair parts need be carried. Furthermore, the problem of the most economical units to be installed; operating a steam engine on what is known as "uniflow" principle, which during severe cold weather might tax our boiler capacity and necessitate the installation of an additional boiler, or use of full Diesel type of crude oil engine would not interfere with boiler capacity and would perhaps be most advantageous though it would necessitate two 100 K. W. units to take care of the load and not give any reserve in case of a break down. As our funds would not permit installing such a plant, the wiring alone was done and paid for out of Special Funds.

In addition to the foregoing improvements, we are pleased to report the installation of a complete and up-to-date Mortuary, allowing ample accommodation for forty-eight bodies if necessary, also refrigerating plant to take care of mortuary and further to provide for care of various biological products at temperature necessary for the retention of their potency. The entire cost of this was \$7935.00.

During the year it was deemed advisable to rearrange our insurance and estimate was made for replacement value of all buildings and equipment, which developed a total valuation of \$2,300,000.00. We are greatly indebted to our fellow-member, Mr. Maurice J. Hartson, for having prepared a blanket form for our policies and placing the sum of \$1,800,000.00 insurance, which amount was considered ample and to which the Louisiana Fire Prevention Bureau concurred.

Yours respectfully,

GEO. J. GLOVER, Chairman;  
CHAS. TESSIER,  
TERENCE SMITH.

## Report of Finance Committee

New Orleans, February 21, 1921.

To the Vice-President and Board of Administrators, Charity Hospital.

Gentlemen:—During the year, the receipts from State Appropriation totaled \$442,139.56, from which must be deducted the Special Appropriation of \$30,000.00 to cover deficit of previous years, leaving \$412,139.56 for current needs. Adding fees and receipts from other sources amounting to \$66,154.51 gives total receipts of \$478,294.07 less amount appropriated for improvements \$22,500.00 leaves \$456,794.07 solely for maintenance.

The actual cost of maintenance was \$473,269.10 which would indicate a deficit for the year of \$17,475.03 in operating expense. As the Treasurer's report shows a surplus of \$4,572.17 for the year, the difference is plainly shown and clearly emphasizes that the appropriation for maintenance fell short and necessitated use of the funds appropriated for improvements.

It is manifest that this institution, to be maintained and keep pace with advanced methods, should receive much more for maintenance, and the appropriation for improvements should be made in substantial amounts rather than in small monthly installments.

During the year 1920, beginning with July, our appropriation was increased as per recommendation of the Board of State Affairs and approved by the General Assembly. This increase for maintenance was \$7,500.00 per month and proves our contention, for had we not received it the end of the year would have shown the appalling deficit of something like \$62,000.00.

It is further manifest that our institution has been operated upon a very economical basis, and it is a matter of regret that so little could be accomplished in the way of needed improvements.

The receipts derived from Legacies and Restricted Donations which are carried separately in Special Fund Account, aggregated \$80,691.41, and the expenditures therefrom were \$60,573.45. \$57,070.70 of this was the cost of equipping the entire hospital with new electric wiring and \$1,677.32 for new equipment, therefore while part of the amount appropriated by the legislature for improvements was used for maintenance the State gained by reason of these expenditures from Special Funds.

During the year, we were quite fortunate in the investment of some of our Special Funds in U. S. Treasury Short-term Certificates paying 5% and 6%.

It is with sorrow your committee reports the death during the year of one of its valued co-workers, Mr. Albert J. Laplace.

Respectfully submitted,

WILLIAM PFAFF, Chairman;  
LEON PFEIFER.

## Superintendent's Report

To the Board of Administrators, Charity Hospital, New Orleans, La.  
Gentlemen:—Herewith I submit to you my report for the year 1920:

### BED CAPACITY OF HOSPITAL

White, Male.....	364
Colored, Male.....	187

Nitrous Oxide	37	136
Prescriptions filled by Optician	248	173
Obstetrical Cases	1,658	1,901
Children Born	592	596
Deaths from Septicaemia (Outside)	4	3
Pathological Department—		
Examinations Made	1919	1920
Pasteur Institute—	50,561	11,326
Number Applying for Treatment	879	667
Number Treated	310	174
Animal Brains Examined	137	119
X-Ray Department—		
Number of Skiagraphs	6,925	15,213
Pharmacy—		
Number of Prescriptions Filled	114,873	112,653
Packages Serum	6,542	6,671
Histories Filed—		
Medical	6,025	5,181
Surgical	8,097	7,636
Gynecological	1,663	1,694
Obstetrical	1,658	1,901
Total	17,443	16,412
Dental Department—		
Number of Patients Treated in Dental Clinics	1,455	805
Teeth Extracted	2,122	1,400
Teeth Treated	252	750
Training School for Nurses—		
Graduates	17	30

In looking over the above figures we are struck with the fact that the Hospital treated many less cases the last year than the year before. This can be attributed to one of several causes. The more money in circulation among people that usually attend Hospitals and who hate to be Charity cases, have enabled them to have private attention at home.

We were surprised, at the small additional increase in the per capita cost over last year, as we expected it to be very near \$2.00 per head, whereas it was only \$1.53.

Our death rate this year shows a falling off which tends to prove that the patients have received better attention from our Visiting Staff.

The number of operations done last year were greater than the two preceding years.

#### IMPROVEMENTS

In the Improvement line for the past year, we have only those which were begun previously or what was absolutely necessary, the Board feeling there might be a change in their Membership, decided to put off improvements until the Governor would appoint the new Board.

*Photograph of the Fifth Class, taken March 28, 1918 at the Charity Hospital (Headquarters of the School) with members of the Hospital Staff and a group of the Instructors.*

However, the following Improvements were made during the year:  
Refrigerator in Morgue.

Paved gallery in Colored Female Building.

Put new annex to Obstetrical Ward No. 39 with tile floor, lavatory, and radiators.

Bought for the Machinist Department, a Welding Out-fit.

Put some Radiators in the Tuberculosis Wards.

We bought a new Ford Truck.

Put a tile floor in the Admitting Room.

The Electric wiring of the Hospital was completed.

- We bought an X-ray bedside unit, and ten (10) gallon Ice Cream Freezer with motor attached.

Put air compressor in the Clinic Building.

The usual amount of painting and carpentry work was done.

Yours respectfully,

S. W. STAFFORD, M. D.,

Superintendent.

## Military School

Established by order of the Surgeon General, U. S. A., at the Charity Hospital, New Orleans, in 1917, under the Direction of Major Rudolph Matas, M. R. C., Professor of Surgery, Tulane University, Visiting Surgeon to the Hospital.

In preparing for the military operation of our vast army in France, large quantities of surgical material and appliances had to be standardized. As fractures of the bones of the extremities contributed over 25 per cent of all casualties and required special methods of treatment, the experts at the Surgeon General's office selected a definite number of splints and appliances which were manufactured on a large scale, the stock material provided by the Government for Army use. It was very important that the newly enlisted medical officers of the Reserve Corps should become familiar and skilled in the use of these standardized war splints. This was the chief function of the school, and incidentally to acquaint the officers with the latest improvements and advances in surgical technic as these were developed at the Front. The advantages offered by the large mass of material at the Charity Hospital led to the selection of this city and this Hospital as the Southern center of several educational units, with Boston, New York, and Chicago for the East and North West.

The School was inaugurated with the first lecture by the Director, at the Miles Amphitheatre, on November 5, 1917 and continued to June 30, 1918. During these eight sessions of a month each, a total of 138 student officers of the Medical Reserve Corps were in attendance, of whom eleven were majors, 34 captains, and 89 lieutenants. In all 23 military posts in 10 states were represented in this School.

The Faculty was composed of the following teachers: Dr. Rudolph Matas, Major M. R. C., Director; Dr. F. W. Parham, Major M. R. C.; Dr. Hermann B. Gessner, Dr. Isidore Cohn, Dr. Charles W. Duval, Dr. Henry Bayon, Dr. W. C. Smith, Dr. Amedee Granger, Dr. Paul McIlhenny, Dr. Lucian H. Landry, Dr. Russell E. Stone, Dr. J. P. Lobenhoffer, Dr. Simon Geismar, and Dr. I. M. Gage, with Dr. S. W. Stafford, Superintendent, and Drs. Maurice J. Gelpi and Hiram W. Kostmayer, House Surgeons, as Ex-Officio members of the teaching staff.

## Report of Superintendent of Clinics

DR. S. W. STAFFORD, Supt.,  
Charity Hospital of Louisiana.

Dear Sir:

In submitting my first annual report as Superintendent of Clinics, I fear the results may seem small in relation to our arduous endeavors to bring the Out-Patient Department to a higher standard of efficiency. Our greatest encouragement and the most hopeful signs of progress are in the increased interest, the new purposes and enthusiasm which seem to pervade the Clinics. This stimulation is largely due to the splendid report made in November by the Committee on Clinics appointed by the Hospital Medical Staff.

During the year, we admitted 26,619 new patients; the number of visits made were 96,227 and the daily average 310.

The Clinics most largely attended were the Venereal and G. U. Clinic for men, the number of admissions being 4984. The G. U. Clinic for women though never so large has made good progress and is characterized by painstaking thoroughness shown in work.

Our Pre-natal Clinic, though small in attendance, is one of our most important as the problems of maternity and their relations to society are enormous. We have increased the equipment by adding such instruments as the Visiting Staff requested, but the small consultation room and the lack of a proper waiting room, work great hardship on both doctors and patients. For the instruction of these patients, we have purchased an exhibit in panel form which teaches very simply the necessity of skilled medical advice and oversight, proper food, air, bathing and sleep. A model layette is shown and a baby bed within means of every one. Miss Velger, a graduate nurse who has had special training in obstetrics, gave 253 talks on the simple laws of hygiene and distributed more than 1500 leaflets on Pre-natal and Infant care which were furnished by the State Health Department. Social difficulties as illegitimacy, desertion and poverty, were referred to the Social Workers.

A panel exhibit on Infant care was also purchased for the mothers who bring their babies to the Pediatrics Clinics and leaflets and booklets on child care distributed. We are indebted to the State Health Department for numerous other attractive health posters and leaflets.

The Eye, Ear, Nose and Throat Clinics are next largest Clinics referring the largest number of patients to the Hospital for operation. Except for the months of November and December, all the other Clinics have been well attended.

The Dental Clinics have increased steadily, having 1125 admissions and 3647 visits. During the summer a new Dental Clinic was added daily from 11 to 12 with Dr. Kelleher as Chief. A Neurology Clinic with Dr. W. J. Otis, Chief was added Tuesday and Thursday. The afternoon Ear, Nose and Throat Clinics and the Dental Clinics except on Friday have been discontinued owing to the fact morning hours seem most convenient for the patients attending.

With the installation of electric lights throughout the Hospital, better lighting facilities have been made available. Compressed air has been put in the Ear, Nose and Throat and Dental Clinics. A drinking fountain, sanitary paper cups and more seats have been provided for the comfort of the patients.

New instruments and other equipments have been added to the value of one thousand and forty (\$1040.00) dollars. The help, including attendants and nurses, has been increased from ten (10) to nineteen (19). At present we have four (4) graduate nurses, one pupil Nurse and one Social Worker.

In order that the Out-Patient Department may fulfill its two great purposes, first and most important, relief of the sick and suffering poor; and

second, the advancement of Medical knowledge, it is indispensable that the recommendations made by the Committee, Dr. John Signorelli, Dr. P. Graffagnino and Dr. Joseph Hume, Chairman should become a general definite outline for development. These recommendations include adequate help, adequate space, a central record system, better equipment, re-organization of Visiting Staff, a permanent Committee for the Clinic Staff, and a Pathological Department. Under the direction of Dr. Duval, the last recommendation, the Pathological Department, has been put into effect and though functioning only a few weeks a marked increase is noticed in amount of laboratory work done in the Clinics. This is an obvious step in progress as shown by the number of new patients admitted for the year, 26,619, and the number of laboratory tests made which were less than 5000. Equally strong arguments can be made for putting into effect all other recommendations.

The Superintendent of Nurses, recognizing the value of clinical experience especially to those Nurses who may wish to specialize in Public Health Nursing, has assigned Senior Pupil Nurses to the Out-Patient Department. These Nurses are given experience in the Pediatrics, Venereal, Eye, Ear, Nose and Throat and Dental Clinics. It has also been our good fortune to cooperate with the Schools of Sociology of Tulane and Loyola Universities by taking into our various clinics those students who wish to specialize in Medical Social Work.

In conclusion, we wish to acknowledge our indebtedness to the Visiting Staff for their splendid and generous services; to the Social Service Department who did so much to humanize our Clinics; to Sisters Stanislaus, Martha and Vincent, for their sympathetic cooperation and helpfulness; to the Nurses and the employees who have shown so much pride in service and true Hospital spirit.

Respectfully,

SARA BABB, R. N.,

Superintendent of Clinics.

## Report of the Treasurer

New Orleans, La., Dec. 31st, 1920.

To the Board of Administrators, Charity Hospital, New Orleans, La.

Gentlemen:—I respectfully submit below summary of receipts and disbursements, and on the pages following, comparative statement.

### RECEIPTS, ETC.—

Appropriations, State of Louisiana:		
For Maintenance, Act 125 of 1918	\$170,000.00	
For Improvements, Act 125 of 1918	12,500.00	
For Deficit, Act 125 of 1918	30,000.00	
For Maintenance and Improvements (Extra Session) Act 3 of 1918	4,639.56	
For Maintenance, Act 75 of 1920	215,000.00	
For Improvements, Act 75 of 1920	10,000.00	
<b>Total</b>	<b>\$442,139.56</b>

## STATE OF LOUISIANA

Office of  
Supervisor of Public Accounts  
Baton Rouge, La.

March 21st, 1921.

To the President and Members Board of Administrators, Charity Hospital,  
New Orleans, La.

Gentlemen:—This is to certify that the semi-annual examinations made by this office of the books, accounts and vouchers of the Charity Hospital, as kept by Secretary-Treasurer, Fred. W. Matthews, proved that the cash receipts and expenditures of the General and all Special Funds during the calendar year 1920 were as follows:

Cash Balance, January 1st, 1920.....	\$ 14,063.85
Receipts, January 1st to December 31st, 1920....	662,120.01
Total Balance and Receipts.....	\$676,183.86
Expenditures During Same Period.....	653,848.63
Cash Balance, December 31st, 1920.....	\$ 22,335.23

Of the above balance, \$750.00 was held by the Secretary-Treasurer, \$200.00 was held by the Sisters, while the balance was on deposit in the City Bank Branch of the Whitney-Central Trust and Savings Bank and the Marine Bank & Trust Company.

Yours very truly,

W. N. McFARLAND,  
Supervisor of Public Accounts.

SUNDRY DONATIONS TO THE CHARITY HOSPITAL  
NEW ORLEANS

A Friend .....	Bolt of Flannelette.
A Friend, 5111 Dauphine St. ....	Reading Matter.
Ames, Mr. ....	Sack of Potatoes.
American Red Cross, New Orleans .....	7 Bedside Screens; 9 Tables.
Babin, Mrs. A., 308 S. Broad St. ....	10 Blankets.
Boudreaux, Mrs. O. ....	6 Chickens.
Boudreaux, Mrs. P. ....	11 Chickens.
Brown, Mrs. ....	Basket of groceries.
Caron, Mrs. M. ....	1 dozen packages each, Borax, Soap Powder, Lighthouse Cleanser.
Clark, Miss .....	Set of dishes for serving room.
Convent of Good Shepherd, N. O. ....	Reading Matter.
Cox, Mrs. Geo., Burnside, La. ....	6 chickens.
Cluet, Mr., New Orleans .....	1 pair crutches.
Commercial Credit Co., 106 Camp St. ....	Quantity of Grapefruit.
Dept. of Conservation, Morgan City .....	70 pound Buffalo Fish.
Desonnier, Mrs. ....	Clothing and Candy for patients.
Dinkelspiel, Mrs. E. ....	Window shades for Ward 53.
Dry Milk Co., The, N. Y. City .....	1 pound Tin of Cremora.
Dugas, Miss Helen, Snake Bend, La. ....	2 chickens.
Dugas, Mrs. ....	1 large goose.
Elks, N. O. Lodge No. 30 .....	12 Invalid chairs.
Fabacher, Mrs. Lawrence, N. O. ....	3 cases Beer, weekly.
Farley, Mrs. J. C., Hammond, La. ....	1 sack sweet potatoes.
Favor, Mrs. O. ....	4 chickens.

Frank, Mr. Robert St.	1 turkey; 1 pig.
Gehlaner, H., English Turn, La.	1 sack turnips; 1 sack cabbage.
Gruley, Mrs.	Fancy table cover.
Guerra, Mrs. Albert, 2901 St. Claude	Flannelette.
Heckinger, Mrs. H.	5 gallons ice cream; 100 asst. cakes.
Haydel, Mrs.	4 large cakes.
Hoase, Mrs. B., 6039 Chestnut St.	1 Brace.
Jesuit Fathers, Baronne St.	Reading matter, weekly.
Joseph, Mrs. Eli	5 gallons ice cream; cakes.
LeBlance & Co., Labarre, La.	13 sacks potatoes.
Libby, McNeil, Libby, 514 Tchoupitoulas St.	5 cases Libby's Condensed Milk; 5 5 cases Libby's Evaporated Milk.
Little Girls of Lookout Club, Thru Mrs. Max Mansburg	5 Boxes Easter eggs for Milliken children.
Louisiana Conservation Commission	2 Barrels, Ducks.
Lax, Mrs.	Oysters and Fish.
McCahill, Wm., Wadesboro, La.	2 sacks sweet potatoes; peppers, string beans and lettuce.
Montegut, Miss Amelie, Laplace, La.	1 case 2nd-hand Surgical instruments.
St. Margaret's Daughters	4 chickens.
Musso, Mrs. Hy., Barracks, La.	6 boxes Easter eggs; entertainment and refreshments for Milliken chil- dren, monthly.
Salles, Mrs. John	2 chickens, basket vegetables; candy; box of fruit; basket flowers.
Scott, Mrs. Henrietta, 808 State St.	Candy; ice cream; cakes; fruit and clothing for colored male patients.
Simoneaux, Mr.	One-half barrel syrup.
Shushan Bros., 532 Canal St.	2 Bottles Stafford Ink.
Sunshine Society	Hotwater bag for each patient in Breux Building; 39 flannelette gowns; 30 cotton gowns; 1 ham; candy to each patient, semi-weekly.
Treadway, Mrs. Jas., Jackson, La.	Chart cabinet for ward use.
Tubercular Helping Hand Circle	New Year's and Easter Dinners for Breux patients; delicacies to each patient, semi-weekly.
Unknown	10 Baby Blankets.
Unknown Friend	Clothing, cakes, candy (4 donations). Raisins, Pork chops. 2 donations).
Ursuline Convent, New Orleans	Reading matter, monthly.
U. S. Marshal's Office, N. O.	40 quarts whiskey.
Vullet, Mrs.	Children's clothing.
Werner, Mr.	Reading matter.
Zenneur, Mrs. O.	Children's clothing.

## REPORT OF THE CHARITY HOSPITAL NEEDLEWORK GUILD

During the year 1920, the Charity Hospital Needlework Guild held sixty-nine meetings. From January 1st to December 31st, there were sent to the hospital the following:

200	Surgeons' Gowns.
190	Internes' Shirts.
300	Bed Shirts.
45	Childrens' Slips.
23	Rompers.
55	Sets Pajamas.
15	Surgeons' Caps.
<hr/>	
828	Garments.

An additional number of one hundred and one garments were sent to the Social Service Department.

The Surgical Dressings made by the Guild during the year were as follows:

42,445	Standard Dressings.
34,918	Sponges.
910	Perineal Pads.
2,293	Laparotomy Sixes.
138	Laparotomy Specials.
189	Gauze Strips.
153	Swabs.
<hr/>	
81,046	

The Guild has a membership of about two hundred. It meets twice a week in a cottage on the grounds of Touro-Shakespeare Almshouse, and pays an annual rental to the Almshouse of two hundred garments.

MRS. J. T. HALSEY,  
Recording Secretary.

## Pathological Department

January 1, 1921.

DR. S. W. STAFFORD, Supt.,  
Charity Hospital,  
New Orleans.

Dear Sir:

It is, indeed, with extreme gratification that I submit to you the comparative statement of the activities of the Pathological Department for the years 1919 and 1920.

Nineteen hundred and twenty has undoubtedly been epoch making in the history of our Department. With the new budget appropriated by the recent Legislature upon the recommendation of your Board, we have been able to nearly completely equip our Laboratories so that at this time it stands second to none in the South. The installation of our new mechanical refrigerating mortuary and antitoxin storing boxes has indeed proven a wise investment. No more are our dead allowed to remain in an ill-kept, ill-cooled box, and at the present time we are able to keep over indefinite periods unclaimed bodies, a great advantage to the poor who are not always able to promptly claim the bodies of their dear ones.

The division of antitoxin production has taken rapid strides. During the year we purchased three new horses, two of which are at the present time producing highly potent anti-tetanic serum. The consumption within our hospital of anti-tetanic serum has reached unprecedented proportions during the last year, and consequently we have had a very small surplus supply to dispose of.

During the last month a tentative arrangement has been made to furnish the Charity Hospital of Shreveport with sera, and we will be able to furnish enough, I believe, from our surplus supply to meet the demands of our sister institution.

Our official quota is now complete, and we are able to respond promptly at all hours of day or night to the needs of our Hospital. We still lack an up-to-date Department of Chemistry, and I strongly urge for the consideration of your Board, the establishment of a division of chemistry and the creation of the position of Assistant Chemist, together with the budgeting of a salary for such a position. Such an official is greatly needed in the Institution, and would more than repay us in the great amount of good which we could accomplish for our patients.

I desire to thank the members of my staff for their earnest endeavors and loyal co-operation during the year, without which, I am sure, we could not have accomplished the unprecedented amount of work recorded in this report. To Dr. S. W. Stafford and the Members of your honorable Board, I desire to extend my heart felt thanks for close co-operation in the meeting and solving of the many problems that have confronted us during the year.

Respectfully submitted,

C. W. DUVAL, M. D.,

Director of Laboratories.

January 1, 1921.

DR. S. W. STAFFORD, Supt.,  
Charity Hospital,  
New Orleans.

Dear Sir:

I have the honor to submit a comparative statement of the work done in the Pathological Department during the years 1919 and 1920.

#### DIVISION OF SURGICAL PATHOLOGY

	1919	1920
Operation Specimens, Microscopic Examination.....	856	1,282
Museum Specimens Prepared.....	53	62
Autopsies Performed.....	240	226
Animal Brains Examined.....	137	119
	<hr/> 1,286	<hr/> 1,689

#### DIVISION OF BACTERIOLOGY

Blood Cultures .....	143	176
Urine Cultures .....	54	72
Feces Cultures .....	1	2

#### SPUTUM CULTURES—

For Pneumococci .....	6	4
For Micro-organisms .....	3	4

#### SPINAL FLUID—

Cultures .....	71	87
Smears for Micro-organisms.....	26	72

#### CULTURES FROM NASO PHARYNX—

For B. Diphtheria.....	345	242
For Meningococci .....	0	11

#### PUS, EXUDATES, TRANSUDATES CULTURED—

Aerobic Cultivation .....	129	194
Anherobic Cultivation .....	11	21
Total Bacterial Counts.....	6	5
Cultures from Autopsies.....	12	1
Water .....	2	0
Milk .....	0	0
Ice .....	1	0

Creatin .....	0	0
Creatinine .....	0	0
CO <sub>2</sub> in Blood.....	0	0
Urea .....	1	15

## TOTAL NITROGEN—

Blood .....	0	9
Urine .....	40	15
Total Chloride .....	52	41
Hydrogen Ion Concentration.....	0	27
	99	147

## DIVISION OF ANTITOXIN AND VACCINE PRODUCTION

## NUMBER OF DOSES DELIVERED DRUG STORE—

Antitetanic Serum, 1,500 units.....	6,684	6,700
Antidiphtheritic Serum 5,000 units.....	0	0
Antidiphtheritic Serum 10,000 units.....	0	0

## NUMBER OF DOSES DELIVERED HOSPITAL DISTRIBUTOR—

Tetanus in Tubes.....	408	323
Tetanus in Syringes.....	248	232
Diphtheria 10,000 units.....	83	123
Diphtheria 5,000 units.....	125	142
Vaccines Prepared .....	13	1,045

TOTAL NUMBER EXAMINATIONS FOR YEAR..... 12,634 11,326

Respectfully submitted,

C. W. DUVAL, M. D.

Case No. 20421-B.    LARGE TUBERCULAR KIDNEY FILLED WITH CALCAREOUS DEPOSITS.  
(Injected with Potassium Bromide Sol.)

## Roentgen Ray Department

New Orleans, April 1st, 1921.

The Board of Directors of Charity Hospital, New Orleans.

Gentlemen:

It is customary and my duty to submit to your honorable Board an annual report of the X-Ray Department, and accordingly I have the pleasure of presenting to you the following:

It has been a privilege to have served as the House Roentgenologist for a period covering the past five years. Now that I have resigned I shall omit further recommendations from this report, showing statistical data only. However, your kind attention is directed to the increased patronage shown by requests made upon this department since 1915, when I took charge of it. These records will show my efforts in the up-building of this important department better than I can describe in detail here.

The following is a comparative tabulated record of the past two years' work:

	1919	1920
Total Number of Exposures Made.....	10,121	15,213
Total Number of Plates Made.....	6,925	9,152
Total Number of Patients .....	8,799	12,071
Total Number of Fluoroscopic Examinations.....	1,944	3,170
Number of Parts Examined—		
Upper Extremities .....	1,042	2,334
Lower Extremities .....	1,042	2,208
Gastro-Intestinal Tract .....	435	1,077
Genito-Urinary Tract .....	263	288
Skull and Bones of Face.....	356	769
Thorax .....	409	1,408
Abdomen and Pelvis.....	210	284
Cases Treated, Exposed to X-Rays.....	2,271	2,128
Patients with Bullets, Localized.....	20	52

Respectfully,

JAMES B. HARNEY, M. D.,

Roentgenologist.

## Report of Dental Clinic

REPORT OF INTERNAL DENTAL CLINIC, CHARITY HOSPITAL,  
NEW ORLEANS, LA.

For Year Ending December 31st, 1920.

DR. A. G. FRIEDRICH, Chief—

Extractions .....	1,047
Treatments .....	69
Consultations .....	72
X-Rays .....	31
Wassermann .....	47
Alv. Abscess .....	42
Vincent's Angina .....	10
Bone Removed .....	7
Pathological Examinations .....	15
Pulpitis .....	5
Referred to other Clinics .....	10
Referred to Hospital .....	12
Referred to Social Service Department .....	10
Fractures Treated .....	35

DR. CHAS. P. KELLEHER, Chief—

Extractions of Teeth .....	251
Referred to X-Ray .....	25
Post-operative .....	2
Referred to Surgical .....	1
Wassermann Requested .....	30
Fractures .....	2
Referred to Loyola .....	1
Examinations .....	80
Gums Treated .....	20
Referred to Hospital .....	6
Jaws Wired .....	3

Respectfully submitted,

A. G. FRIEDRICH, M. D.

CHAS. P. KELLEHER, M. D.

## Report of the Hay Fever Clinic

New Orleans, April 12th, 1921.

Dr. S. W. Stafford, Superintendent of Charity Hospital, City.

Dear Doctor Stafford:

In order to ascertain the influence of sex and age in hayfever, our clinical charts record the sex of the patients, the age, the approximate date of beginning of the hayfever attacks, and the duration of the disease. This data, in addition to the results of the questionnaire on hayfever, made in Louisiana by the United States Public Health Service in 1916, gives interesting information on this subject.

In the cases of Series C, D and E, 44 percent were male and 56 percent female. In the Questionnaire of the U. S. Public Health Service, it was shown that 63 percent of the cases of hayfever were males, and 37 percent females. The discrepancy in these percentages are due to the fact that women usually have more leisure than men to have chronic diseases treated. This applies especially to the poor, as shown by the fact that the percentage of females was relatively higher in our Hayfever Clinic than in cases treated in private practice.

### THE AGES OF HAYFEVER CASES

The ages of hayfever patients in this series vary from 6 to 64 years, the general average being 34 years. The decades were distributed as follows:

Percentage of cases between the age of	
1 and 10 years.....	2%
10 and 20 years.....	12%
20 and 30 years.....	21%
30 and 40 years.....	33%
40 and 50 years.....	17%
50 and 60 years.....	12%
60 and 70 years.....	3%

### AGE OF DEVELOPMENT OF HAYFEVER

The age of which hayfever developed in these cases varied from 4 years (1 case) to 59 years, the average being 27 years. The ages were distributed as follows:

Percentage of cases which developed between the age of	
1 and 10 years.....	5%
10 and 20 years.....	19%
20 and 30 years.....	33%
30 and 40 years.....	30%
40 and 50 years.....	10%
50 and 60 years.....	3%

This indicates that the most common period for the development of hayfever is between the ages of 20 and 40 (64%). It corresponds closely with our former report, based on the Questionnaire of the U. S. Public Health Service in Louisiana, in which 62% of the cases were found to be between the ages of 20 and 40 years.

### DURATION OF HAYFEVER

The duration of hayfever in these cases varied from 1 month to 46 years, the general average being 9.7 years. The duration is divided as follows:

Percentage of cases which lasted from	
1 and 5 years.....	50%
5 and 10 years.....	23%
10 and 20 years.....	16%
20 and 30 years.....	7%
30 and 40 years.....	3%
40 and 50 years.....	1%

The question of the development of an acquired immunity from continued exposure to the specific pollens is hard to determine, as it is difficult to eliminate the question of decreased exposure. If a patient moves to a locality in which the pollen exposure is below his relative immunity, he will not suffer from hayfever. This may also happen without changing his residence, by the reduction of the weeds in his vicinity, so as to reduce the number of atmospheric pollens below his degree of relative immunity.

A number of cases have been recorded in which immunity gradually developed without change of exposure. That the natural development of immunity is a slow process, however, is indicated by the records, which show that 50% of the cases had suffered for over 10 years, 12% over 20 years, and 4% over 30 years.

#### OCCUPATION OF HAYFEVER SUBJECTS

It is commonly supposed that persons in the country suffer little from hayfever, and the alleged fact that farmers are not affected is often used as an argument against the pollen theory of hayfever. Our investigations, however, have shown that the occupation which has the largest number of hayfever cases (thirty-eight percent), in Louisiana is that of the farmer. As they are the most exposed to the pollens, this is only natural, and shows that the greater resistance due to their outdoor life is offset by the greater exposure.

Although professional men are supposed to be especially prone to hayfever, this was found not to be the case, as they represent only six percent of the cases. Next to the farmers, the greatest number of cases were in persons with indoor occupations (twenty-nine percent) those with outdoor occupations being nineteen percent.

#### PROPORTION OF WHITE AND COLORED HAYFEVER CASES

Many reports and works on hayfever refer to its rarity in the colored race. Our records in Louisiana, however, show that the proportion of white and colored are seventy-nine and twenty-one percent, respectively. As the United States census (1910) states that there were 713,874 colored and 941,086 white persons in Louisiana, this indicates that the colored are affected with hayfever about one-third as often as the whites.

Very sincerely,

W. SCHÉPPEGRELL, M. D.  
N. F. THIBERGE, M. D.

## Report of the Directress of Nurses

To the Board of Administrators of the Charity Hospital of New Orleans.

Gentlemen:—I gladly avail myself of this opportunity to present to you the major problems of the Training School, hence the discussion of the minor problems will be deferred until such time when direct representation can be made.

It is broadly true that the insufficient number of student nurses is the most vital fact agitating the hospital world today. The haziness which obscures the true cause of this condition is responsible for the elaboration of theories as numerous as there are individuals interested in this problem. If definite action regarding this question were taken, possibly there would result a loosening or a destruction of standards; though not now appreciated because of the pressing needs to maintain a nursing service adequate in some degree to meet the requirements of our sick. I wish to quote a comment from the official organ of the American Nurses Association: "We understand, in a way, the frantic efforts of unsuccessful schools to gain more pupils by lowering their standards, but it is inconceivable that a school which has always had students and those of the highest class, should consider shortening its term or curtailing its curriculum." With this statement I thoroughly agree. While keenly conscious of the fact that owing to the lack of nurses the service rendered is not as efficient as we would wish it to be, I am not convinced that the abridgment of the course would increase the number of applicants.

The next problem we have to present is the needs of the Training School. The present time offers a favorable opportunity to again visualize these. It is customary for all hospitals to advance in improvements. Upon the Training School rests a tremendous responsibility touching the vital interests of the hospital and should not be regarded as a separate organization. The fatiguing routine of the daily tasks and the constant depressing influences which surround nurses while on duty are both physically and mentally enervating, and necessitate quarters which are home-like, pleasant and comfortable. We are in need of a well-equipped library which should be the source of ready information, with current events, magazines, both cultural and scientific. The rooms require better lighting and should be attractively furnished to encourage those who come from homes of refinement and to educate others who have been less fortunate.

I wish to express to the Board, the Superintendent and the House Officers, my sincere appreciation for their advice and support. To the Lectury Faculty I extend hearty thanks for their generous response to the demands of the School, while the co-operation and loyalty of the Training School and Nursing Staffs merit my deepest gratitude.

The number of applicants accepted during the year was twenty-five. The applications numbered one hundred and forty. Thirty nurses graduated, three were dismissed, and two resigned. The present number of Pupil Nurses in the Training School is fifty; in addition to these we have twenty-one graduate nurses and twenty-five registered nursing Sisters.

### SUMMARY OF OBSTETRICAL CASES IN 1920 AS PER HISTORIES FILED IN THE RECORD ROOM

There were 680 Maternity Cases delivered in the Hospital.

White .....	253	Primiparae .....	358
Colored .....	427	Multiparae .....	322

#### Presentations—

#### Positions—

Vertex .....	( Left Occipito-anterior .....	388
	( Right Occipito-anterior .....	167
	( Left Occipito-posterior .....	3
	( Right Occipito-posterior .....	18
Breech .....		23
Transverse .....		7
Face .....		3
Foot .....		4
Shoulder .....		12
Hand .....		10
Not Reported .....		63
		680

### MANNER OF DELIVERY

Naturally .....	627
By Forceps .....	19
By Podalic Version (some with forceps) .....	21
By Caesarian Section (Deaths—Mothers, 6; Infants, 3) .....	13
	680

There were 4 cases of Twin Parturition.

There was no case of Triplets.

### MORTALITY OF MOTHERS

There were 19 deaths among the mothers, or 2.76 per cent.

From Eclampsia .....	10
From Shock .....	5
From Rupture of Uterus .....	2
From Nephritis .....	2
	19

The number of Children born was 684.

Males .....	369	Delivered living .....	598
Females .....	315	Still-born .....	86
